In connection with Mr. Amory's forthcoming meeting with SRS, here are some of the salient points which I suggest to discuss:

1. The meaning of the term "research" and the clarification of the extent and type of research to be done under present personnel conditions. The possibility of eliminating the word "research" in the name of the group.
2. The problem of speculation in conjunction with the [redacted] paper and the IAC memorandum. The virtual impossibility of limiting speculation to 25X1A Communism as a technical concept.
3. A definition of what is meant by "countering Communism" in the IAC memorandum and the difficulties experienced in this field with DDP. The fact that under this term, many points can and must be discussed which do not seem to be purely Communist problems even though they are connected with the general problem.
4. The necessity of enlarging the field to International Socialism, especially where the connection between Communism and Socialism is a matter of Soviet policy. Also, ~~within the realm of international front organizations~~, the International Socialist organizations should be made the object of research and analysis by SRS.
5. The problem of "coordination": is DDI coordination with ONE and OCI, plus State's OIR, sufficient or must consent by DDP be secured? What about reciprocity which so far did not exist? In view of the operational aspects of the DDP component and the much broader view SRS is supposed to take, wouldn't there be automatically differences of opinion which cannot be healed without compromising SRS's original analysis?
6. So far, there has been no attempt whatsoever by State to collaborate [redacted] What can be done about this and would it be advisable to initiate such collaboration by pressure from high level officers?
